### MTC STUDENTS TAKE LEARNING FOR A RIDE

Our 6th grade middle school students have been hard at work designing and building their very own marble roller coasters as part of a hands-on STEM project!

This exciting activity combined science, engineering, and creativity. Using the Engineering Design Process, students planned, built, tested, and reworked their coaster designs to ensure their marble could travel through twists, turns, and loops. Along the way, they learned to calculate both potential and kinetic energy bringing real physics concepts to life in a fun and interactive way.
